Recent Projects

The projects below were built using ReactJS, Redux, and CSS. Any additional tools are specified per project.
Click on a project's title to open its website, or the Git icon for the repository.

Ardi ○ – A website developed with NextJS, React Context, and Sass. Developed an interactive tutorial library.

Portfolio ○ – My personal portfolio. Implemented Lottie and AnimeJS animations using Adobe After Effects, Illustrator, and Bodymovin.

Project Organizer ○ - MERN stack web app developed to manage project tasks with simple controls and an intuitive UI.

Green Zenphony ○ – Designed and developed a website for the restaurant in Queens, NY.

Quiza ○ – MERN stack quiz-making web app. Registered users can create and share multiple-choice quizzes. Supports mathematical notation.
